

Project Profile

Commercial Sector

Building Education Revolution Project

These works, for the WA state government as part of the Building Education Revolution initiative, consisted of a complete electrical demolition and construction to the primary school administration building. All works were completed to the head contractor's timeline and budget. Working within School hours and numerous variations meant close communication with both the client and the contractor in order to complete the project in a timely and seamless manner. The contractor was supplied with Police Clearance certificates of all employees; working with children checks were also required.

The school was so pleased with the Techforce Electrical team's workmanship and service that they subsequently contracted further works directly. Power distribution was reconfigured in 8 classrooms to accommodate significantly more computers throughout the school.

Project: Highgate Primary
School Location: Highgate WA
Timing: May – August 2012
Project Value: \$110,000+

"The work carried out by Techforce Electrical at Highgate Primary School was exemplary. We appreciated the fast, professional and efficient service provided by your company. We look forward to using Techforce again."

- Donna Baken, Business Manager.
